Suicide Prevention in Systems

Culture of Safety and Prevention

- All interested parties engaged and informed
- Persons with lived experience integrated into leadership
- Restorative, just, and learning culture and post-incident process

Best Practices, Policies, & Pathways

- Practices and pathways to promote safety, recovery, and health
- Co-design with service users, families, and community
- Data-driven continuous quality improvement

Workforce Education and Development

- Shared framework and language across teams, services, and systems
- Lived experience role in providing workforce education
- Sustainable ongoing learning and onboarding of new staff into culture
